Hawke's Bay Waterway Guidelines

Low Impact Design

Prepared by:
Earl Shaver, Aqua Terra International Ltd

Reviewed by:
Gary Clode, Manager - Engineering

Acknowledgement

This document for the Hawke's Bay Region is based primarily on the Auckland Regional Council's Technical Publication No. 124 "Low Impact Design Manual for the Auckland Region". The ARC gave permission to use their document and that permission is greatly appreciated.

Modifications to the ARC document have been made to account for advances in the approach and to reflect local conditions.

Note

This document is a living document and may be reviewed from time to time as industry standards change and best practice evolves. Please contact Hawke's Bay Regional Council to ensure the latest version is used.

Contents

1	Introduction	1
1.1	Purpose	1
1.2	Audience.....	2
1.3	Background.....	2
1.4	Problem Statement	3
1.5	Limitations of Existing Practices.....	5
1.6	Low Impact Design (LID) Approach.....	9
1.7	Catchment Wide Approaches.....	11
1.8	Organisation of Guidelines	12
2	The Water Cycle	14
2.1	The hydrologic cycle	14
2.2	Precipitation	16
2.3	Groundwater Considerations.....	16
2.4	Stormwater Quantity	18
2.5	Stormwater Quality.....	21
2.6	Stream Morphology.....	25
2.7	Stream Ecology.....	27
2.8	Importance of First and Second Order Streams	28
2.9	Bibliography	30
3	Site Resources.....	31
3.1	Introduction	31
3.2	Terrestrial Ecology and Landscape Form.....	31
3.3	Wetlands.....	34
3.4	Floodplains.....	36
3.5	Riparian Buffers	39
3.6	Vegetation Cover	42
3.7	Soils	43
3.8	Slopes/Topography	45
3.9	Other Natural Features	45
3.10	Linkage with Site Development	47
3.11	Natural Mechanisms for Stormwater Pollution Removal	47
3.12	Bibliography	49
4	Low impact design approach.....	50
4.1	Introduction	50
4.2	Low Impact Design Principles	50
4.3	Approaches and Techniques.....	52
4.4	Reduction in Setbacks	56
4.5	Reduction in Imperviousness	57
4.6	Low Impact Design Approach: Minimum Site Disturbance	62
4.7	LID Practices.....	64
4.8	Bibliography	72
5	Design Procedures.....	73
5.1	Introduction	73
5.2	Design procedure in overview	73
5.3	LID Design Approach	74
5.4	Runoff calculations.....	81
5.5	Time of concentration.....	82
5.6	Additional Stormwater Controls as Needed.....	82
5.7	How to Measure Success.....	83
5.8	Other Types of Development	84
5.9	Case studies	86
5.10	Bibliography	89

6	LID catchment considerations	90
6.1	Introduction	90
6.2	Catchment checklist	90
6.3	Case studies	91
6.4	Bibliography	99
