The Chairman and Councillors
HB Regional Council
Napier

Dear Councillors ,

I applaud the actions of the Council in dramatically reducing Oppossum numbers in the region.

I would like to see the pest control programme extended to cover wasps

Wasps doa great deal of damage to domestic and commercial orchards and are a serious threat to the bees ,which are absolutely essential to pastoral and pip fruit based economy of Hawkes Bay. Wasps are also a major threat to native birds as they consume honey dew in the bush which is a staple food for the bird life.

I urge the HBRC to consider extending thier pest control programme to cover wasps. This could be done at little extra expense to the Councils existing operations
Yours sincerely
Jacqueline Mc Intyre
