

Sub nur Name/s of submitter/s	Support/of Submission	Resolution sough of Council
1 Elizabeth Holmes Warren	Oppose The subtle increases which have occurred already over the past decade have proven to seriously affect the quality of life in the surrounding residential, lifestyle and rural habitation Mushroom farm seems to have blatant disregard for normal following of district rules, regulations and consent conditions regarding odour levels, pond construction and building maintenance, and as such is not a desirable neighbour or corporate citizen,	I wish HDC decline the application
2 Rachel Kathleen & Andrew John French	Oppose On the grounds that it will create additional odour for HN residents. HDC has a duty to consider the well-being of the residents living close to TMM. The foul odour coming from TMM cannot be allowed to increase in either frequency or duration as it will negatively impact nearby residents,	Decline all aspects of the application
3 Caleb, Kevin & Paula Dresser	Oppose Increased production will result in a significant increase in smell. The increased smell would be disturbing, districting and have a negative impact overall, there should be a plan to mitigate the stench that results, if required via a change in location. I want to be able to leave my home and walk in the fresh air without being surrounded by a smell even more prominent than at current. Requests that the resource consent be put on hold until a plan for smell mitigation is in place and demonstrated to be effective.	That HDC place consent on hold until a plan for smell mitigation is put in place and demonstrated to be effective
4 Racheal Greer	Support TMM is a long standing business in the community and enabling the increase will not only fund more money into the community and jobs, plus odour control to assist those currently affected.	I support the council to find in favour of TMM and approve the entire application
5 Mark Apatu - Apatu Farms Limited	Support Apatu Farms supports the application made by TMM,	We wish that consent be granted
6 Maxwell George Parkes	Support TMM has operated on this site for a number of years and employ a good number of locals, I do not think their operation should be curtailed by encroaching subdivisions	Application be granted in its entirety
7 Andrea Paterson	Support I live in Brookvale Road and I do not have any concerns with regards to the above	Wish that applicant be granted consent to increase production and for everything that is involved for them to achieve this
8 Rebecca Tough	Support I support TMM application, as I am an employee	Wish that consent be granted
9 Christine Cater Goldsmith	Support I fully support TMM for expanding their business, they have been part of the community for as long as I can remember (and I'm 55!). I grew up in Clive and sometimes we would get the smell from Awatoto or the sewage works and never bothered us. Proud to support them and I buy their mushrooms from the Far North where I live	Please granted the application
10 Alex David Roy Robertson	Support Support this based on the fact that it is likely to increase job numbers in the region and the supply of mushrooms from locals to locals. I am all for supporting the local economy and always will be. I agree to consent because my family have bought mushrooms directly from this farm for years and it is part of the local history and has held job numbers for locals for years,	I have nothing to contest, local jobs, local benefit, I am all for the consent
11 Jaeden Minogue Russell	Support TMM should be able to expand as they have had a massive positive influence in the community for a very long time. I love the idea of more jobs being available as I personally believe it is hard to find work. The more jobs the better. I do not see how TMM Ltd proposal will negatively affect the community	I support everything TMM is proposing/applying to do/seeking support for. They clearly have the best interest of the community at heart
12 Tairawhiti Alexandria Clarke	Support I agree to 100 tonnes, and support the application	I wish the application be granted
13 Emma Ladd	Support Supports all parts, I think it should go ahead	Wish the consent be granted.
14 Julie Cronin	Support Support the application on the grounds that it is an existing business, built on a rural site suited to the purpose it was established for. The encroachment of the residential zone could not have reasonably been foreseen by the original business, and the business should not have to suffer for it. The business is beneficial to the community, as an employer and through returning money to the community through staff spending and through local business commitments	I wish the application be granted in full, with provision for expansion/extension in the future as required, and all new residential encroachments be halted, or notifiable as encroaching on the buffer zone
15 Kane Grundy	Support I have worked at the site in question and believe their operation is sound and that the odours are not significant for complaint. TMM have done very well with modifications to buildings and method to improve air quality and while working on the site did not find the organic odour strong or offensive.	Wish that HDC grant TMM the permission to expand the production facility and grant them the resource consent that the need to proceed
16 Philip Tasker-Poland	Support Support the increase in production of mushrooms to 100tonnes p/w, including increased compost production, extension of phase 1 bunker, a new phase 2 tunnel house, and an increase number in staff, and a recycled water/oxidation pond and associated pump shed	Wish the application be granted
17 Jude Cairncross	Support Support the growth of this iconic industry in HN, it provides jobs for people and is a well known brand round the country. I have lived above the farm several times over the past year and have only smelt the compost once, The farm was here before all the houses and deserves to be able to grow its business	I wish the application to be granted
18 Kerry John Pritchard	Support Support the application in its entirety	I wish it granted
19 Carol Patricia Ferguson	Support I support the application by TMM to increase the IRP, including increase compost production, extension to phase 1 bunker, new phase 2 tunnel house increased staff, and recycled water/oxidation pond and pumpshed	I support full application as it stands
20 Colleen Bawden	Support TMM is well established and a well-known brand - a great asset to HN. It supplies us with fresh delicious mushrooms and the increased supply to meet demand will increase employment/jobs opportunities in our region. They should not be held back by council or local residents and should be able to expand The mushroom farm has been there MUCH longer than the new subdivision	Wish that TMM be granted this application.
21 Vincent Michaelsen	Support I run a napier business which relies on Te Mata mushrooms, not only do they do a great job, but I'd like to continue to support a local business	I would like to see this application granted
22 Ronnie Andrew Netane	Support TMM are one of my biggest clients as we look after all of their polypanel construction needs. I support TMM 100% as this will benefit the environment, local employment and productivity of a locally owned and operated well established business	HDC should support TMM as they are will to solve the problem of odour coming from the plant
23 Stephen Ferguson	Support I support the application as this will grow jobs in the community and help the company better handle the odour that new neighbours are complaining about This business has been here for a lot longer than most residents. Now a business is investing to remove odors these people knew about before building their houses.	I support the application for the reasons mentioned prior
24 Shantelle Turner	Support Support increase of land usage, increase of IRP of mushrooms onsite, increased compost production, extension buildings, increase of staff and implementation of pond and pump shed	I seek the council to grant the above application to Te Mata mushrooms
25 Tiki Marra	Support Fully support, TMM is an iconic well managed HB business with a very small impact on the surrounding environment	The consent must be granted and further positive support from both the HBRC and the HDC should be given
26 Amanda Mary Milne	Support Fully support. They run a great business and I love having them there as part of the Havelock community.	Wish the application be granted
27 Britten Ian Scott	Support Support application 100%. We need more production & more employment in Hawkes Bay & people like Michael Whittaker need to be supported	I seek a decision from HDC to grant Te Mata Mushroom Co 100% approval to their complete application.
28 Chanelle Bullock	Support My whole life Te Mata Mushrooms has given Jobs and income to HB, and the pride that Hawke's Bay can grow fruit but has a long secured mushroom farm	Granted we need to support our local businesses
29 Reuben Boyd	Support I am happy to support Te Mata mushrooms and the submission.	I support Te Mata Mushrooms and wish they be granted the expansion of the bunkers 2 tunnel house, recycled water/oxidation pond, associated pump shed and employees
30 Liz Morrison	Support An old established business has served Hawke's bay for lots of years and been popular with every HB business and population, not every district has our commodity at their doorstep	Granted
31 Lisa Batenburg	Support Increase in employment opportunities is beneficial to the region, Increase in production contributes to economic growth	I support the proposal for an increase in the intensive rural production of Te Mata Mushrooms and believe that granting of this application can only be beneficial to the entire community and Hawke's Bay in general.
32 Karyn Craft	Support Previous poor planning decisions by HDC have put TMM in this predicament of drastically reduced separation from residential neighbours. To help fund ongoing odour containment, they should be allowed to expand their production.	Grant the consent application
33 Paul Terrence McCarthy	Oppose I have resided in the area for the last 12 years, up until 2015 I didn't have a problem but now it has become nauseating, I ask Council to bring your picnic chair down to Arataki Road between 6am-730am or 830pm-930pm to take in the unpleasant odours that exist. My major astonishment in this application is that we have owners of the farm declaring that they need to increase production to generate income to complete the planned improvements for the containment of odours. This is like "putting the cart before the horse". At the end of the day there is no guarantee that there will be sufficient business profits to enable the property improvements to be undertaken - it has certainly proven to be the case in the past due to non satisfaction of condition no. 13. <b>(COMPREHENSIVE SUBMISSION)</b>	Decline with a requirement to satisfy all previous outstanding resource consent requirements. Request all property improvements be achieved within first 8 months. On completion of improvements compost production may be increased by 25 tonnes per 7 day period. Further 2 year reviews could follow with the aim of increasing measurement and/or the number of home owners complaints. This is Hawkes Bay's "Eden Park". Bite the bullet Te Mata Mushrooms - do yourself a favour and relocate or be happy with getting away with the production levels you already have.
34 Brenda Harrington	Support Support	Granted
35 The Speights Alehouse Napier	Support Support the full submission	We wish for the application to be granted.

36	Hawley Family Trust C/o Chris Hawley	:Oppose	That HDC financilly support the shifting of the composting facility owing to the continued evelopment of land within the recommended exclusion zone (Jacobs report, T&T review)	<b>That HDC financially support the resiting of TMM composting facility.</b>	2 Submissions Received stating the same
37	Ross Todd, Rosco's Bulk Yard Limited	:Support	I am in support of this increase in production as they provide a quality product in there mushrooms and in the compost of which I purchase and use a large quantity each month and is a vital part of my business and the increased production will cement a continuous supply which under the current production can be limited	<b>Wish the application be granted</b>	
38	Lynne Harrison	:Support	I support the submission. Te Mata are a long standing responsible employer who should be able to adapt their operation and expand	<b>Wish the application be granted.</b>	
39	Hayden & Kelsi Senior	:Oppose	I'm against Te Mata Mushrooms expanding. The smell is horrendous and going from 25 tonnes to 100 tonnes is only going to make it worse. I think it's ridiculous that they're considering to expand the site because they're only going to get more complaints. More housing is going in and the town is growing in that direction I believe the best solution is to move out where land is cheaper and you have can expand as much as you want when you want. The council should help and support them on this journey	<b>Wish the appliaction be declined</b>	
40	Douglas Arthur & Ngaire Fay Fifield	:Oppose	We feel TMM are just laughing at us local ratepayers and the HDC by blatently flaunting all the now in place bylaws, not paying fines and arrogantly making chagnes before applying for consent. Retrospective consent should have been obtained BEFORE construction.	<b>Decline - composting, additional bunkers, retrospective consent and odour</b>	2 Submissions Received stating the same
41	Jeffery William & Beverly Dale Whittaker	:Support	Support the application to increase production. Economies of scale will enable investment in info structure to address the ongoing odour complaints, introduce better processes and employ more local workers on a very regular basis. Expansion will enable the company to be more competetive on a nationwide scale <a href="#">(Comprehensive submission)</a>	<b>Over successive Councils planning decisions have been made that allowed the Residential growth of HN to drastically intrude on the activities of a viable and progressive industry It is time that the HBC accepted that as a consequence of their actions and that of the councils planners that they have placed the future of the business in jeopardy though the on going harassment of environmental prosscutions. This lack of foresight has create enormous tension, financial cost and uncertainty for a very large employer in the district This industry has operated in the district for over 50 years and the HDC is failing in their duty of care if the Council is not supportive of this applicaion to expand</b>	
42	Margaret Anne & Paul Leatham Davey	:Support	Proposal to increase composting form 120 tonnes to 500 tonnes gives us cause for continuing concern. We wish to be assured the company is genuine in its obligation to limit off site odour effects by implementing odour mitigation prior to increasing production. <a href="#">(comprehensive submission)</a>	<b>Supports application being granted subject to these conditons: implement odour mitigation prior to increasing production, and review operation practices to ensure current &amp; proposed operations will limit the production of offensive odours and contain them to the site</b>	
43	Derek John Lawson	:Oppose	Oppose the increase as it will increase the number of days the odour will penetrate the house especially when prevailing northerlys are blowing Cannot enjoy outdoor living in summer due to the smells. When our kids were at Te Mata primary school they had to spend recess indoors (school has been around for longer (1958) compared to the mushroom farm (1967).	<b>Wish that the consent be declined</b>	
44	Heather Jean Wilson	:Support	I consider Te Mata mushrooms a great resource for Hastings area bringing in money, supporting locals with jobs and putting Hastings on the map as producer of high quality mushrooms. Because of this I would support Te Mata mushrooms intent to expand, becoming more viable as an operation while increasing labour requirements and income into the area.	<b>I would hope the council will grant the applicant their requests and would support the application</b>	
45	William James Barker	:Support	I fully support the application from Te Mata Mushrooms. They were growing mushrooms on this site long before any houses were built nearby They are a significant employer in our community.	<b>The whole project should proceed</b>	
46	Barry Reece Pulford	:Support	The increase from 25 tonnes to 100 tonnes will not happen overnight, it may take years. This company produces an excellent product, provides employment for local people and has been in business since 1967. It is not the fault of the company that residential homes have moved closer and closer to the farm in the past 50 years. The local authorities are to blame for this. I grew up in Williams Street in the suburb of Mahora, which is quite close to the Tomoana Freezing Works. Sometimes on the odd day the smell from the Works was not pleasant but we accepted it as the freezing works was there long before we were and that fact that many of our close neighbours, friends and family worked at Tomoana. Look at the devastation that happened to Mahora when the works closed, I would hate to see the mushroom farm force to move out of its present location if the application is declined.	<b>The application for land use consent from The Te Mata Mushroom Company Ltd is granted</b>	
47	Mateja Kotnik	:Support	I support Te Mata Mushrooms expansion. Increasing production will bring a lot more money and jobs for HB. TMM are prepared to do what they need to reduce the odour to keep the neighbours happy, but they need to be able to finance these costs, so they need to grow more mushrooms in order to do this.	<b>The resource consent should be granted</b>	
48	Paul W & Elaine M Rogers	:Oppose	There have been attempts to rectify the problem but it continues to be an issue to varying degrees. Increasing the production would indicate a logical conclusion of increase in odours. Even if there are efforts made to mange odours there is no guarantee that they can be totally suppressed. Whilst Council have worked with the Mushroom Farm to resolve the odour issue it hasn't been successful. This is an issue for ongoing housing development With the increase in manufacturing will come an increase of heavy vehicles.	<b>We ask that the Hastings District Council decline the Resource Consent.</b>	
49	Alisha Agnew	:Support	I support Te Mata Mushrooms application. Previous poor planning decisions by HDC have put TMM in this predicament of drastically reduced separation from residential neighbours. To help fund ongoing odour containment, they should be allowed to expand their opeation.	<b>Consent be granted</b>	
50	Christine L Blackberry	:Support	I support Te Mata Mushroom application that will allow increase in production. This will secure the future of the business, which has contributed to the community on the same site for 50 years and wish to continue this. This is valuable primary industry and needs the support to expand which will enable upgrading of the site, while protecting the jobs of the current 120 staff and to create more jobs	<b>Consent be granted</b>	
51	Jean Te Huia	:Oppose	Does not promote sustainable management of natural & physical resources & contrary to the purposes & principles of the RMA. More than minor adverse effects eg noise dust odour traffic and no effort to avoid/remedy or mitigate those effects. This will exacerbate the existing conflict between this intensive operation and the adjacent residential activities within residential zones and proposed zones. We are sick and tired of the constant odour breaches, unacceptable noise, and increasing traffic and the impact it is having on our lives and property.	<b>We seek the full application be declined. Further seek that this application be heard at the same time as the HBRC odour consent</b>	
52	Steve McNamara	:Oppose	I am vehmently opposed to this as many properties close to the site already struggle with the stench produced by HN Mushrooms who has been operating outside of Resource Consent boundaries for a long time	<b>Decline application. I will reconsider if the composting process is relocated to Waipukurau as I understand is happening</b>	
53	Michael John Harris, Stephen Richard Harris, Harris F	:Support	As a local supplier to The Te Mata Mushrooms Company Ltd we are concerned the effect of turning down this consent will have on the local economy. They contribute not only local jobs within the company but also supporting local businesses. The council should be supporting local companies that are investing in the local economy. If TMM are unable to continue to grow and become more efficient in the current climate we risk loosing another valuable company from our district. Established company's must not be encumbered from growth by urban sprawl.	<b>To grant the consent in its entirety</b>	
54	Oswald Peter Church (Peter)	:Support	I WHOLEHEARTEDLY SUPPORT THE APPLICATION TO INCREASE PRODUCTION AT THE FACILITY. I have lived in the Brookvale area for 38 years and I have watched the area drastically change during this time. The stench from mushroom compost back then was overpowering on the days when compost was moved or turned. The current owner has significantly improved discharge further until it is rarely smelt even in a stiff easterly breeze. I live in a built up area approx 300m from the plant and find it clean and rarely do I smell a discharge. Some residents who move into the area to be in a rural type environment with pleasant outlook are proving to be a problem nationwide as they want the ambience as long as the country ceases to work. The operation provides employment and an excellent use of rural land	<b>I wish that the application be granted in full so that the operation can operate as efficiently as possible providing much needed employment in the area as well as a useful use of rural land. Too much land surrounding HN is now becoming unproductive as developers ( or would be developers ) landbank the area in anticipation of zoning changes. Hastings needs agriculture to survive, most business depends to some extent on the rural sector and land not being gainfully used achieves nothing and no employment of the population</b>	
55	Caron & Carl Wezel	:Oppose	Does not promote sustainable management of natural & physical resources & contrary to the purposes & principles of the RMA. More than minor adverse effects eg noise dust odour traffic and no effort to avoid/remedy or mitigate those effects. This will exacerbate the existing conflict between this intensive operation and the adjacent residential activities within residential zones and proposed zones. We are sick and tired of the constant odour breaches, unacceptable noise, and increasing traffic and the impact it is having on our lives and property.	<b>We seek the full application be declined. Further seek that this application be heard at the same time as the HBRC odour consent</b>	
56	Mair Family Trust - Peter Mair	:Oppose	Does not promote sustainable management of natural & physical resources & contrary to the purposes & principles of the RMA. More than minor adverse effects eg noise dust odour traffic and no effort to avoid/remedy or mitigate those effects. This will exacerbate the existing conflict between this intensive operation and the adjacent residential activities within residential zones and proposed zones. We are sick and tired of the constant odour breaches, unacceptable noise, and increasing traffic and the impact it is having on our lives and property.	<b>We seek the full application be declined. Further seek that this application be heard at the same time as the HBRC odour consent</b>	
57	Allan Peter & Janet Karen Heeney	:Oppose	Does not promote sustainable management of natural & physical resources & contrary to the purposes & principles of the RMA. More than minor adverse effects eg noise dust odour traffic and no effort to avoid/remedy or mitigate those effects. This will exacerbate the existing conflict between this intensive operation and the adjacent residential activities within residential zones and proposed zones. We are sick and tired of the constant odour breaches, unacceptable noise, and increasing traffic and the impact it is having on our lives and property.	<b>We seek the full application be declined. Further seek that this application be heard at the same time as the HBRC odour consent</b>	
58	David & Sue Eddy	:Oppose	Does not promote sustainable management of natural & physical resources & contrary to the purposes & principles of the RMA. More than minor adverse effects eg noise dust odour traffic and no effort to avoid/remedy or mitigate those effects. This will exacerbate the existing conflict between this intensive operation and the adjacent residential activities within residential zones and proposed zones. We are sick and tired of the constant odour breaches, unacceptable noise, and increasing traffic and the impact it is having on our lives and property.	<b>We seek the full application be declined. Further seek that this application be heard at the same time as the HBRC odour consent</b>	
59	Bill & Linda Wezel	:Oppose	Does not promote sustainable management of natural & physical resources & contrary to the purposes & principles of the RMA. More than minor adverse effects eg noise dust odour traffic and no effort to avoid/remedy or mitigate those effects. This will exacerbate the existing conflict between this intensive operation and the adjacent residential activities within residential zones and proposed zones. We are sick and tired of the constant odour breaches, unacceptable noise, and increasing traffic and the impact it is having on our lives and property.	<b>We seek the full application be declined. Further seek that this application be heard at the same time as the HBRC odour consent</b>	
60	Murray V Graham	:Support	I support Te Mata Mushrooms application which will allow an increase in production and this will ensure the future of the business. TMM is a very important primary sector operation	<b>The consents should be granted,</b>	

		and business, currently employing 120 staff and not seasonal, thus giving families of the area full time employment. This business has been has been operating on the same site for over 50 years and needs to continue.	
61	TNZ Growing Products - Jacqui Jones & Corey Hodge	Support Increased production would allow the company to further invest in odour control to the direct benefit of neighbouring properties. Relocation is not economically viable or desirable. An increase in production rates would provide the necessary economies of scale to make odour mitigation affordable. The predicted noise levels from the operation of the proposed facility would comply with relevant noise criteria. Full time staff will also increase and will not cause any adverse effect on the function, safety or capacity of the relevant road networks with the increase in vehicle traffic.	We seek a ruling from the Hasting District Council in favour of the applicants submission to increase their existing IRP consent.
62	CDL Land NZ Ltd	Oppose The propose activity does not promote sustainable management of natural and physical resources and is contrary to the purposes and principles of the RMA. Will have adverse effects which are more than minor in respect of noise, dust, odour and traffic and the proposal does not adequately avoid, remedy or mitigate those effects. It is contrary to the relevant District Plan and Proposed District Plan. The proposal will continue to exacerbate the existing conflict between the proposed intensive operation and adjacent residential activities within residential zones and proposed residential zones.	CDL seeks that consent be declined. CDL also seek that this application be heard at the same time as the applicants applications to the HBRC.
63	Cecile Hurford	Support I support them expanding as per their application. Te Mata Mushrooms is a valuable business in Havelock North and I enjoy cycling out there to get fresh mushrooms I also believe that if they expand they are better able to deal with the smells from the compost, which has been a problem for local people for a while.	Consent should be granted
64	Vivienne Mary Foster	Oppose Does not promote sustainable management of natural & physical resources & contrary to the purposes & principles of the RMA. More than minor adverse effects eg noise dust odour traffic and no effort to avoid/remedy or mitigate those effects. This will exacerbate the existing conflict between this intensive operation and the adjacent residential activities within residential zones and proposed zones. We are sick and tired of the constant odour breaches, unacceptable noise, and increasing traffic and the impact it is having on our lives and property.	We seek the full application be declined. Further seek that this application be heard at the same time as the HBRC odour consent
65	Steve Foster	Oppose Does not promote sustainable management of natural & physical resources & contrary to the purposes & principles of the RMA. More than minor adverse effects eg noise dust odour traffic and no effort to avoid/remedy or mitigate those effects. This will exacerbate the existing conflict between this intensive operation and the adjacent residential activities within residential zones and proposed zones. We are sick and tired of the constant odour breaches, unacceptable noise, and increasing traffic and the impact it is having on our lives and property.	We seek the full application be declined. Further seek that this application be heard at the same time as the HBRC odour consent
66	Toni, Mike, Emma & George Frost	Oppose Does not promote sustainable management of natural & physical resources & contrary to the purposes & principles of the RMA. More than minor adverse effects eg noise dust odour traffic and no effort to avoid/remedy or mitigate those effects. This will exacerbate the existing conflict between this intensive operation and the adjacent residential activities within residential zones and proposed zones. We are sick and tired of the constant odour breaches, unacceptable noise, and increasing traffic and the impact it is having on our lives and property.	We seek the full application be declined. Further seek that this application be heard at the same time as the HBRC odour consent
67	Rachel Katharine Jane Williams-Wright	Oppose Does not promote sustainable management of natural & physical resources & contrary to the purposes & principles of the RMA. More than minor adverse effects eg noise dust odour traffic and no effort to avoid/remedy or mitigate those effects. This will exacerbate the existing conflict between this intensive operation and the adjacent residential activities within residential zones and proposed zones. We are sick and tired of the constant odour breaches, unacceptable noise, and increasing traffic and the impact it is having on our lives and property. I am recovering from leukaemia and I'm very concerned about air pollution having an impact on my health. Recently we have noted mushrooms growing in our lawn we have not fertilised our lawn, therefore we are concerned that mushroom spores are being put into the environment and landing in our garden.	We seek the full application be declined. Further seek that this application be heard at the same time as the HBRC odour consent
68	Ryan Gaffaney	Oppose Based on their existing track record of odour breaches of consent, Te Mata Mushrooms Company cannot be trusted to run their operation in a manner that will guarantee that offensive and objectionable odour on adjoining residential activities will be avoided or mitigated such that the effects are no more than minor. That if a significantly increased production is allowed and associated activities (including composting) by way of resource consent the activity will be lawfully established This will make it even more difficult to ensure compliance of offensive and objectionable odour effects that could occur should the 'new' operation be poorly managed It will be difficult to enforce the avoidance of offensive and objectionable odour effects once the scale and intensity of production is increased. That the adverse odour effects significantly affect (negatively) the quality of life of residents living in the area	That the appliation be declined.
69	Roger Millward	Oppose Does not promote sustainable management of natural & physical resources & contrary to the purposes & principles of the RMA. More than minor adverse effects eg noise dust odour traffic and no effort to avoid/remedy or mitigate those effects. This will exacerbate the existing conflict between this intensive operation and the adjacent residential activities within residential zones and proposed zones. We are sick and tired of the constant odour breaches, unacceptable noise, and increasing traffic and the impact it is having on our lives and property.	We seek the full application be declined. Further seek that this application be heard at the same time as the HBRC odour consent
70	Brian Allan & Diane Elizabeth Riddiford	Oppose Does not promote sustainable management of natural & physical resources & contrary to the purposes & principles of the RMA. More than minor adverse effects eg noise dust odour traffic and no effort to avoid/remedy or mitigate those effects. This will exacerbate the existing conflict between this intensive operation and the adjacent residential activities within residential zones and proposed zones. We are sick and tired of the constant odour breaches, unacceptable noise, and increasing traffic and the impact it is having on our lives and property.	We seek the full application be declined. Further seek that this application be heard at the same time as the HBRC odour consent
71	Daniel John Taylor	Oppose I believe that further intensification by TMM will have a significant detrimental impact on the business surroundings, to an extent that substantially outweighs any benefits derived by the company to the community. It is my belief that if TMM are unable to meet current conditions, and comfortably co-exist with neighbours, that any intensification will simply exacerbate an existing and long-standing, problem. Whilst the science in the proposal may appear sound at first reading, I have very little confidence based on past behaviour that implementation would be undertaken in a timely or comprehensive manner. TMM needs to earn the confidence of the community and regulators under current conditions before intensification should even be considered.	Request the application be declined, until such time as Council and the Community has confidence in TMM to meet it's regulatory and social obligations Should the decision be taken to approve the application, I request that the Council places strict, enforceable conditions on TMM with regards to environmental impact caused by further intensification in such a way that minimises impact on residents during construction, and ultimately results in a business that has very low impact on its environment.
72	Alison Kay & Kenneth Ian Foy	Support We live in the area and are so thankful for living in this neighbourhood, (Alison for 50 years , Ken 17 years ) for the large employment numbers of the mushroom farm, and their yummy product AND the fact that the mushroom farm was here long before the council approved development of the neighbouring properties. Plus it has a great tourism venture planned for the future	Wish the consent be granted
73	Ronald William Satherley	Oppose Does not promote sustainable management of natural & physical resources & contrary to the purposes & principles of the RMA. More than minor adverse effects eg noise dust odour traffic and no effort to avoid/remedy or mitigate those effects. This will exacerbate the existing conflict between this intensive operation and the adjacent residential activities within residential zones and proposed zones. We are sick and tired of the constant odour breaches, unacceptable noise, and increasing traffic and the impact it is having on our lives and property.	We seek the full application be declined. Further seek that this application be heard at the same time as the HBRC odour consent
74	Craig Hamish Satherley	Oppose Does not promote sustainable management of natural & physical resources & contrary to the purposes & principles of the RMA. More than minor adverse effects eg noise dust odour traffic and no effort to avoid/remedy or mitigate those effects. This will exacerbate the existing conflict between this intensive operation and the adjacent residential activities within residential zones and proposed zones. We are sick and tired of the constant odour breaches, unacceptable noise, and increasing traffic and the impact it is having on our lives and property.	We seek the full application be declined. Further seek that this application be heard at the same time as the HBRC odour consent
75	Craig Hamish Satherley	Oppose Does not promote sustainable management of natural & physical resources & contrary to the purposes & principles of the RMA. More than minor adverse effects eg noise dust odour traffic and no effort to avoid/remedy or mitigate those effects. This will exacerbate the existing conflict between this intensive operation and the adjacent residential activities within residential zones and proposed zones. We are sick and tired of the constant odour breaches, unacceptable noise, and increasing traffic and the impact it is having on our lives and property.	2 Submissions Received stating the same
76	Mason Ronald Satherley	Oppose Does not promote sustainable management of natural & physical resources & contrary to the purposes & principles of the RMA. More than minor adverse effects eg noise dust odour traffic and no effort to avoid/remedy or mitigate those effects. This will exacerbate the existing conflict between this intensive operation and the adjacent residential activities within residential zones and proposed zones. We are sick and tired of the constant odour breaches, unacceptable noise, and increasing traffic and the impact it is having on our lives and property.	We seek the full application be declined. Further seek that this application be heard at the same time as the HBRC odour consent
77	Mason Ronald Satherley	Oppose Does not promote sustainable management of natural & physical resources & contrary to the purposes & principles of the RMA. More than minor adverse effects eg noise dust odour traffic and no effort to avoid/remedy or mitigate those effects. This will exacerbate the existing conflict between this intensive operation and the adjacent residential activities within residential zones and proposed zones. We are sick and tired of the constant odour breaches, unacceptable noise, and increasing traffic and the impact it is having on our lives and property.	We seek the full application be declined. Further seek that this application be heard at the same time as the HBRC odour consent
78	Bruce Walter & Diana Gay Evans	Oppose Does not promote sustainable management of natural & physical resources & contrary to the purposes & principles of the RMA. More than minor adverse effects eg noise dust odour traffic and no effort to avoid/remedy or mitigate those effects. This will exacerbate the existing conflict between this intensive operation and the adjacent residential activities within residential zones and proposed zones. We are sick and tired of the constant odour breaches, unacceptable noise, and increasing traffic and the impact it is having on our lives and property.	We seek the full application be declined. Further seek that this application be heard at the same time as the HBRC odour consent
79	Daniel John Russell	Oppose I live close to the site and I strongly oppose the application on the grounds that currently at 25t per week the smell is already offensive and increased production will make the smell unbearable. I understand that Te Mata mushrooms has been established long before the houses arrived around them but production was a lot lower than it is now and until they can mitigate the odours produced I don't think it's fair on the nearby residents to allow production to increase. Both councils allowed the area around Te Mata mushrooms to be built on and should take into consideration the wellbeing of its rate payers.	I wish the council to decline the application until the smell produced by Te Mata Mushrooms has been dealt with.
80	Steven Bradley Beech	Oppose Does not promote sustainable management of natural & physical resources & contrary to the purposes & principles of the RMA.	We seek the full application be declined. Further seek that this application be heard at the same time as the HBRC odour consent

		More than minor adverse effects eg noise dust odour traffic and no effort to avoid/remedy or mitigate those effects. This will exacerbate the existing conflict between this intensive operation and the adjacent residential activities within residential zones and proposed zones. We are sick and tired of the constant odour breaches, unacceptable noise, and increasing traffic and the impact it is having on our lives and property.	
81 Heidi Beech	Oppose	Does not promote sustainable management of natural & physical resources & contrary to the purposes & principles of the RMA. More than minor adverse effects eg noise dust odour traffic and no effort to avoid/remedy or mitigate those effects. This will exacerbate the existing conflict between this intensive operation and the adjacent residential activities within residential zones and proposed zones. We are sick and tired of the constant odour breaches, unacceptable noise, and increasing traffic and the impact it is having on our lives and property.	We seek the full application be declined. Further seek that this application be heard at the same time as the HBRC odour consent
82 Rochelle Chadwick	Oppose	I oppose the Submission as the current odor from the Mushroom farm is offensive and increasing production would make it unbearable to live in the current residential area.	I wish for the application to be declined on the basis that he Odor Control hasn't been addressed despite previous guarantees to do so.
83 Donald Selwyn Whitfield	Support	All communities rely on successful businesses and especially production of food and natural produce from land. This business has been in operation for many years and can make good and productive use of the land it occupies to the benefit of citizens by way of employment, food production and even suitably processed waste is valuable to increase soil fertility in other places. While the land may be tempting to use for housing development and give rise to short term monetary profits, I believe that will not be in the best long term interests of the community and other areas closer to existing subdivisions should be considered for that purpose.	I seek the decision of the Hastings District Council to grant the Consent in full to the applicant
84 Kylie Foster, Paul Hawinkels & Garden Media Author	Support	Expansion will not only increase job opportunities onsite, but by being able to supply more mushrooms and mushroom compost, the cost is kept lower for customers Although the company has had some issues with smell in the past, from reports I have read, I believe this is far and few between, especially considering the amount of people in the area. TMM is also working on providing solutions for this and by increasing production, will be able to further invest in better odour control management solutions.	We are in favour of the Te Mata Mushroom Proposal being granted.
85 Brett Chapman, 3 Waters Manager	Oppose	The AEE does not consider effects on the public drinking water supply located in Brookvale Rd. The proposed activity is within the source water catchment that draws water from the local groundwater system for a public water supply. This supply provides drinking water to the Havelock North community and has been subject to a significant contamination event in 2016. We oppose the application on the basis that the application has not considered the Brookvale bore 3 and water treatment plant that is located 300m down gradient of the TMM site The application has not considered the effects of the proposed composting operation (leachate and wastewater treatment system) and the potential to impact on surface and groundwater quality in an area that is within the abstraction zone for a public water supply. The evidence from the Board of Inquiry as to the cause of public water supply contamination in 2016 highlighted concerns with the extent of earthworks, stream diversions and activities within the Te Mata Mushrooms site that could impact on groundwater quality and compromise drinking water safety	We seek to ensure that the applicant duly considers how their proposal may impact on the public water supply and that they engage with the water supplier on their proposal and any controls they propose to mitigate risks to the groundwater that is the source for the Brookvale water supply.
86 Philippa Kate Taylor	Oppose	I believe that expansion of both mushroom and compost production by TMM will have a significant detrimental impact on the residents nearby, to an extent that substantially outweighs any benefits derived by the company or the community. TMM has failed to control the odour under its current operational model by breaching its current resource consent and attracting many, many complaints. One only needs to look at complaints registers, and action taken by Council previously, to understand that this is already a significant problem to the local community Concerned about effect of continued odour problems and the intensification and effect on house value, and others nearby. There are beautiful, sunny, Hawkes Bay days when we cannot enjoy our outside living because the smell is so bad; we are forced back inside and can't even have the windows open. Until TMM are meeting their current Resource conditions, and can comfortably co-exist with neighbours, they should not be permitted to expand their operations. TMM needs to earn the confidence and trust of the community and regulators under current conditions before intensification should be even considered.	I request the application be declined, until such time as TMM meet their current Resource consents, and Council and the Community has confidence in TMM to meet its regulatory and social obligations. Should the decision be taken to approve the application, I request that the Council places strict, conditions on TMM with regards to environmental impact caused, and that these are rigorously enforced, in such a way that minimises impact on residents during construction and beyond, and ultimately results in a business that has very low impact on its environment
87 Rachel Anna Landon	Oppose	I oppose the application to increase compost production at the site on the basis that increased compost production could result in continued offensive odour from the site or increased risk of contamination of the Drinking Water supply. Te Mata Mushrooms is the frequent cause of offensive odours that impact our property I oppose the application to increase compost production at the site as I am concerned that increasing compost production will worsen the existing odour issues. My view is that the existing odour problems should be resolved before consent is given to increase production at the site. Further to the NES requirements the public inquiry into the Havelock North water contamination incident identified principles for safe drinking water including the fact that the protection of source water is of paramount importance. AEE does not include any assessment of the environmental impact that the development will have on surface water runoff, groundwater, overflow or leakage from the recycled pond, and lack of consideration of Nes Sources of Drinking Water	Wish the application be declined. If the application is granted I would like it amended to address the risk of expanding the compost production on the Havelock North drinking water supply. Conditions: existing offensive odour discharges to be resolved before increasing production of compost, notification to the community, the drinking water supplier and the consent authority if an event eg overflow or leak from the oxidation pond) that could significantly affect the safety of a community drinking water supply occurs.
88 Colin David & Susan Hunkin	Oppose	Applicant has shown he is unwilling/unable to control the odour which is often at a level which makes neighbours nauseous. We are unable to enjoy the full use of our properties including gardening and bbqs, as the odour cannot be accurately measured any increase in production would result in a proportionate increase in foul odour. Retrospective application for oxidation pond must be declined, as this indicated the applicants contempt for the law and has proven he will never comply with the rules placed on him.	The full application should be declined. If the applicant wishes to increase production this should take place at a new location with no effect on neighbours
89 Graeme Otton Robson	Support	Previous poor planning by HDC has put TMMC in this predicament. They are a business that has been here for 50+ years and employ 120+ staff. They are a proud business that is good for HN/Hastings and HB. As they are a seasonal operation the expansion will give more opportunities for employment.	Consent should be given to TMM
90 Heather Anne Cooper	Support	Previous poor planning by HDC have put TMMC in this predicament by drastically reducing the separation from residential subdivisions. To help fund ongoing odour containment TMMC should be allowed to expand their production and also provide more employment to the people of HB	Consent should be granted
91 Ian Robert Chapman	Support	Significant improvement and investment in recent years by TMMC to their manufacturing processes as both part of continued improvement and being a responsible business, the investments made have a huge financial impact on the business thus supports their continuation as a significant employer and to grow to cover costs of investment "we cannot let rural business be constrained by a 'precious few' who come along later.	HDC grant TMMC the right to increase their production at their Brookvale Site
92 Sarah Margaret Taylor	Oppose	I can deal with the current stench, any more and I'd feel the need to close doors & windows. Increased composting and production would increase the frequency and degree of smell	I wish the applicant to be declined,
93 Herman Stiefelhagen	Oppose	The existing situation regarding foul odour emanating from TMMC is already unbearable, making life miserable, often sickening and should have been stopped years ago.	Consent should not be granted unless all odour emanating from their premises is eliminated.
94 George H & Gailleen D Reedy	Oppose	Increasing the IRP will ratchet up the smell - we already smell bad odour, increasing production will increase the incidence. This will impact on the amenity value of our property	Decline application
95 John Anthony & Vivienne Margret Scott	Oppose	Does not promote sustainable management of natural & physical resources & contrary to the purposes & principles of the RMA. More than minor adverse effects eg noise dust odour traffic and no effort to avoid/remedy or mitigate those effects. This will exacerbate the existing conflict between this intensive operation and the adjacent residential activities within residential zones and proposed zones. We are sick and tired of the constant odour breaches, unacceptable noise, and increasing traffic and the impact it is having on our lives and property.	We seek the full application be declined. Further seek that this application be heard at the same time as the HBRC odour consent
96 Marc David & Sally-Anne Herring	Support	The farm was in situ before and or prior to the council changing the residential status of the nearby land	The submission be granted
97 Nicole Marcia Simon	Oppose	A bigger operation will create more bad smells, living in proximity to TMM means that several times a week we are subjected to the most horrendous smell, often when entertaining on a Saturday evening or early morning. Difficult to get smell out of house once inside	Application should be declined due to ongoing issues with their breach of their current RC. What is the latest on this? I went to a public meeting and HBRC admitted they were in breach but nothing has changed
98 Robert & Mary Layton	Oppose	Does not promote sustainable management of natural & physical resources & contrary to the purposes & principles of the RMA. More than minor adverse effects eg noise dust odour traffic and no effort to avoid/remedy or mitigate those effects. This will exacerbate the existing conflict between this intensive operation and the adjacent residential activities within residential zones and proposed zones. We are sick and tired of the constant odour breaches, unacceptable noise, and increasing traffic and the impact it is having on our lives and property.	We seek the full application be declined. Further seek that this application be heard at the same time as the HBRC odour consent
99 Richard James & Margaret Valmai Evans	Support	Supports TMM desire to increase production to be more competitive and enable them to improve odour control, they will employ more staff which are seasonal, and TMM complements the orchards & berry farms. They are an asset to the area for employment year-round and spin off for other business	Support the application.
100 Landsdale Development Limited	Oppose	TMM has a history of non compliance with its existing air discharge consent, and continually operates in a non-complying manner (appears earthworks were undertaken without consent) Stated mitigation measures in past consent have yet to be implemented and appears the applicant seeks to operate at an increased level without employing mitigation. There will be increased cumulative effects, increased adverse environmental effects, and offensive and objectionable odours beyond the boundaries of the site. The activity will be contrary to the relevant obj/pols of the Proposed HDP and Part 2 of the RMA.	Applicant is aware of the existing consent renewals before HBRC and we believe it is appropriate that a Joint Hearing be held pursuant to s102 of the RMA. Both apps are intrinsically linked Seeks that all necessary mitigation measures are employed from the outset and that there be no objectionable or offensive odours beyond the site Any actual or potential effects on the surrounding residential environment are avoided, remedied or mitigated. In its current form, seek application be declined.
101 Andrew Quayle	Oppose	Does not promote sustainable management of natural & physical resources & contrary to the purposes & principles of the RMA. More than minor adverse effects eg noise dust odour traffic and no effort to avoid/remedy or mitigate those effects. This will exacerbate the existing conflict between this intensive operation and the adjacent residential activities within residential zones and proposed zones. We are sick and tired of the constant odour breaches, unacceptable noise, and increasing traffic and the impact it is having on our lives and property.	We seek the full application be declined. Further seek that this application be heard at the same time as the HBRC odour consent
102 Carolyn Elizabeth & Roger Horace Joseph Wallis	Oppose	Does not promote sustainable management of natural & physical resources & contrary to the purposes & principles of the RMA. More than minor adverse effects eg noise dust odour traffic and no effort to avoid/remedy or mitigate those effects. This will exacerbate the existing conflict between this intensive operation and the adjacent residential activities within residential zones and proposed zones. We are sick and tired of the constant odour breaches, unacceptable noise, and increasing traffic and the impact it is having on our lives and property.	We seek the full application be declined. Further seek that this application be heard at the same time as the HBRC odour consent
103 Michael Bruce Fowler	Oppose	Does not promote sustainable management of natural & physical resources & contrary to the purposes & principles of the RMA. More than minor adverse effects eg noise dust odour traffic and no effort to avoid/remedy or mitigate those effects. This will exacerbate the existing conflict between this intensive operation and the adjacent residential activities within residential zones and proposed zones. We are sick and tired of the constant odour breaches, unacceptable noise, and increasing traffic and the impact it is having on our lives and property.	We seek the full application be declined. Further seek that this application be heard at the same time as the HBRC odour consent
104 Luke Edward Donovan	Oppose	Does not promote sustainable management of natural & physical resources & contrary to the purposes & principles of the RMA.	We seek the full application be declined. Further seek that this application be heard at the same time as the HBRC odour consent

		More than minor adverse effects eg noise dust odour traffic and no effort to avoid/remedy or mitigate those effects. This will exacerbate the existing conflict between this intensive operation and the adjacent residential activities within residential zones and proposed zones. We are sick and tired of the constant odour breaches, unacceptable noise, and increasing traffic and the impact it is having on our lives and property.	
104A	Geoffrey Francis Donovan	Oppose Does not promote sustainable management of natural & physical resources & contrary to the purposes & principles of the RMA. More than minor adverse effects eg noise dust odour traffic and no effort to avoid/remedy or mitigate those effects. This will exacerbate the existing conflict between this intensive operation and the adjacent residential activities within residential zones and proposed zones. We are sick and tired of the constant odour breaches, unacceptable noise, and increasing traffic and the impact it is having on our lives and property.	
	105 JJ Lunam	Support between this intensive operation and the adjacent residential activities within residential zones and proposed zones. We are sick and tired of the constant odour breaches, unacceptable noise, and increasing traffic and the impact it is having on our lives and property. associated supply businesses, secure the future of the business which employs 120 staff, and financially supports hundreds indirectly, they should be supported in their endeavours as they have contributed to the community for 50+ years and seek to do so for decades to come. TMM is not a seasonal business like many in the region and provides low skilled and young adults into permanent jobs and careers	Application be granted
	106 Adam Mark Fyfe	Oppose Opposes the increase in compost production as the odours during mixing are "very bad"	"I propose that the applicant is stopped from mixing compost at current site and shift it somewhere else anyway from everyone"
	107 Mark Nelson Fyfe	Oppose Oppose the increased compost production as it smells very bad when this is mixed	"Applicant needs to be declined on his request to increase compost production"
	108 Regan & Bethany Senior	Oppose The odour associated with the composting is particularly objectionable where we live. We oppose any increase in odour Suggests HDC rezone TMM land to residential to make it more attractive & economic for TMM to sell the land and relocate elsewhere	That HDC does not grant consent for any activity which may increase odour for surrounding houses
	109 Ann Marie Wilson & Ross Owen Smith	Oppose Oppose increase in production as the smell will increase & would be detrimental to our outdoor living. We believe the excessive output & smell would effect the long term value of our home due to current TMM issues have been heavily publicised and this consent will make matters worse	Decline in all matters
	110 Kevin John & Margaret Williams	Oppose Mr Whittaker has never made any effort to contact the residents to discuss or seek compromise, Whittaker has been abusive & the HBRC pollution hotline is the only avenue. TMM have continued to use delay tactics since the HBRC abatement notice 6yrs ago	Wish consent be declined and that health issues be fully investigated, composting & associated activiteis should be removed.
	111 Zara Schollum	Support Support the expansion as it will help locals get jobs, and provide many unemplyed people with ways to support themselves/family	That consent be granted.
	112 Timothy William Wood	Support Supports TMM as increased prouction will create more jobs for the people of HB which is good for the economy	That consent be granted.
	113 Lenie Doheslager	Support Support the increase in production/expand site as it will create more work for local people	That consent be granted.
	114 Jim & Margaret Cooper	Support We support this as a normal farming practice and to support TMM to increase production to reach an economic level	Support TMM and its endavous to increase production to an economic level
	115 Nicole Marcia Simon	Oppose A bigger operation will create more bad smells, living in proximity to TMM means that several times a week we are subjected to the most horrendous smell, often when entertaining on a Saturday evening or early morning. Difficult to get smell out of house once inside	TMM should be declined consent due to the ongoing issues with the breach of current consent
	116 Leslie Falls	Support Support all parts of application	That consent be granted.
	117 Kay & John Sime	Support I want to support local business	That consent be granted.
	118 Judith Michele Lima	Support Increasing production will help secure the future of the business and provide more work for locals & keep growing awesome mushrooms	That consent be granted.
	119 Potene Lima	Support I am in total support of the farm staying open/expanding. This farm was thre long befroe the houses began encroaching. Close the farm and local jobs will go, prices of mushrooms will soar as the major South Island supplier gainst market superiorty	Grant consent to keep farm and increase production
	120 Daniel Juan Jones	Support Supports the expansion of the farm from 25 to 100 tonne per week	That consent to expand be granted.
	121 Douglas Arthur & Ngairé Fay Fifield	Oppose We feel TMM are just laughing at us local ratepayers and the HHDC by blatently flaunting all the now in place bylaws, not paying fines and arrogantly making chagnes before applying for consent Retrospective consent should have been obtained BEFORE construction.	Decline - composting, additional bunkers, retrospective consent and odour
	122 Suzanne Harly	Support Supports the applicant to increase production and increase staff numbers	That the applicant be granted consent.
	123 Andrew Plimmer & Jessica Foss-Plimmer	Support Increasing production and expanding the site will create more work for local businesses	The consent should be granted,
	124 Layton Smith	Support Increasing the number of staff will help more low skilled workers and young adults into jobs, the company has supported the district for over 50 years	This consent should be granted
	125 William Andrew & Jan Rees	Support I support the increase in production of mushrooms, this company has been at this site for several years & be allowed to expand production	That approval be ganted to increase production of mushrooms as set out in the application
	126 Margaret Anne & Paul Leatham Davey	Support Proposal to increase composting form 120 tonnes to 500 tonnes gives us cause for continuing concern. We wish to be assured the company is genuine in its obligation to limit off site odour effects by implementing odour mitigation prior to increasing production. <a href="#">(comprehensive submission)</a>	Supports application being granted subject to these conditons: implement odour mitigation prior to increasing production, and review operation practices to ensure current & proposed operations will limit the production of offensive odours and contain them to the site
	127 Joanna Catherine Charlton	Support Supports increasing production which will create more jobs for people of HB, benefits for low skilled workers & young adults trying to get jobs	I want this application to be granted
	128 Hendrick Stefanus & Mariana Faber	Support Increasing the number of staff will help more HB to support themselves and their families, along with getting young adults into jobs	Support this consent being granted
	129 Kerrie Ann Lovell	Support I support TMM application by increasing production and expanding the site will increase more work for local business	Consent be granted.
	130 Martin Graham Speeden	Support Previous poor planning by HDC have put TMM in this predicament by drastically reducing he separation residential properties, Arataki Honey were helped to relocate across the road while TMM were not supported. Only way to fund ongoing odour containment is allowing expansion of production and their operation	Grant consent. If composting part cant get consent, HDC should be responsible to fund the cost of a new facility further away
	131 Suzanne Brenda Stables	Support Increasing and expanding production at the site will create more work for local people	Consent be granted
	132 Kallam Ross McNabb, Ashley Jean Briggs & Ross John	Support Supports increasing production and creating more jobs, mushroom farm has been there for 50+ years and have had a very hard time over last few years	Consent be granted
	133 Robyn Margaret Boag	Support Supports the resource consent as it will help bring more jobs to the bay and help expand the business	Wish the applicant be granted for all the submissions being asked for.
	134 Yi Pez	Support Support TMM application, increasing production will createt more jobs for the people of HB	I want this consent to be granted
	135 Kerry Michele Mackintosh	Support Expansion of this long established business and the related increase in employment is good for the growth of our local economy. Am more than satisfied with the proposed extensions and systems.	I wish the application be granted
	136 David Mackintosh	Support TMM are an old established business producing an important food source and employing a big workforce - any expansion will be good for the region	I wish the application be granted
	137 Clinton William Frater	Support TMM is a very small farm by comparison to Meadows & others round the world. Do we really want Council bad planning & whinging neighbours to put it out of business?	Approve the consent.
	138 Jason Raymond Austin	Support Support a HB business trying to generate more income and jobs in HB	The consent should be granted
	139 Kerrilyn Timms	Support Increasing production and expanding the site will create more jobs for the people of HB	Applicant to be granted.
	140 Hawley Family Trust C/o Chris Hawley	Oppose That HDC financilly support the shifting of the composting facility owing to the continued evelopment of land within the recommended exclusion zone (Jacobs report, T&T review)	That HDC financially support the resiting of TMM composting facility.
	141 Katrina Simpson	Oppose It is bad enough with the smells and odours coming from the site, and they are wanting to increase by a huge amount! NO WAY!	Declined - it shouldn't increase in the size of the composting, nor do it over a 7 period.
	142 Derek John Lawson	Oppose Oppose the increase as it will increase the number of days the odour will penetrate the house especially when prevailing northerlys are blowing Cannot enjoy outdoor living in summer due to the smells. When our kids were at Te Mata primary school they had to spend recess indoors (school has been around for longer (1958) compared to the mushroom farm (1967).	Wish that the consent be declined
	143 HBRC - Ellen Humphries	No comment, on the assumption that there are no changes to the current HBRC consent, and that the applicant has talked with relevant lwi authorities	no requests
			2 Submissions Received stating the same
			2 Submissions Received stating the same
			2 Submissions Received stating the same
			2 Submissions Received stating the same

		we will raise any concerns through the HBRC application	
144 Greenstone Land Developments Limited	:Oppose Pa	In general support of the increase production of mushrooms, but would prefer for the associated increase in compost to not occur on site, and that the composting operation be relocated away from residential land identified in HPUDS (Brookvale and Arataki) We seek to maintain and enhance the residential amenity of the area (current development of arataki motor lodge) (comprehensive submission with attachments and discussion of Proposed District Plan objectives/policies	<b>Seek that part of the application relating to increasing mushroom production be granted with conditions requiring production to take place off site</b> <b>Seek that part of the application to increase compost production on site be declined,</b>
145 Paul Anthony Frost	:Oppose	Believe the odour has changed significantly since change of ownership and reverse sensitivity should not be to blame. Have undertaken surveys of residents who are in agreement about increased odour, removal of trees has impact airflow. (comprehensive submission with 2 attachments)	<b>Any consent granted should require upgrades be completed first and demonstrated to work (staged process).</b> <b>Deadline for second round of upgrades must be completed. If commencement of the second round of upgrades is to remain contingent upon exceeding 200 tonnes a week a mechanism to ensure HBRC knows it has been exceeded</b>
146 Darrel & June Hall	:Oppose	The applicant does not pass the test on "there shall be no objectionable or offensive odour to the extent that it causes an adverse effect at or beyond the boundary of the site". Nothing in the application gives us confidence that our community will be able to enjoy our amenity and undertake their daily activities & be able to breath clean fresh air. Industry codes of practice should not be relied on. (comprehensive submission from a HBRC staff member)	<b>Application should not be granted</b> <b>Application should be heard at a joint hearing with HBRC by independent commissioners</b>
147 Kevin Snee, CEO, HB District Health Board	Oppose	The neighbouring community is already reporting adverse health effects from the odour. Ongoing exposure is known to be associated with adverse health effects, particularly mental health and sensitisation to odours at low levels. Potential for <i>Legionella longbeachae</i> to be discharged to air. Proposal aims to reduce odours but does not appear to fully mitigate the odour effects and the risks of microbiological discharges have not been assessed. Concern with discharge of microbiological contaminants to groundwater not assessed,	<b>Should consent be granted DHB requests the following conditions:</b> <b>6 monthly report of odour complaints to HBRC and Medical Officer of Health</b> <b>A complaints register should have columns for weather conditions and activity occurring at site</b>
148 John & Lesley Hurrey		Unknown	
149 Heather Murphy	:Oppose	Does not promote sustainable management of natural & physical resources & contrary to the purposes & principles of the RMA. More than minor adverse effects eg noise dust odour traffic and no effort to avoid/remedy or mitigate those effects. This will exacerbate the existing conflict between this intensive operation and the adjacent residential activities within residential zones and proposed zones. We are sick and tired of the constant odour breaches, unacceptable noise, and increasing traffic and the impact it is having on our lives and property.	<b>We seek the full application be declined. Further seek that this application be heard at the same time as the HBRC odour consent</b>
150 Colin & Susan Mitchell	:Oppose	That HDC oppose the application due to the persistent odour generated on a regular basis affects our quality of life and often have to refrain from sitting outdoors and come in and close all our windows and doors	<b>Consent should not be granted</b>
151 Patricia Ann & Graham John Kidd	:Oppose	Oppose the application due to the already offensive stench and we have to endure and the mushroom spores growing in our garden	<b>Be declined due to the contamination of air and the as yet unknown health risks.</b>
152 Karen & Russell Dalldorf	021027040	The odour generated is not appropriate over a residential area. Affects our lifestyle and outdoor enjoyment. Having to close doors/windows on a lovely day is not what we should have to do	<b>The applicant should not be granted permission</b>
153 Helen Mary Lawson	:Oppose	Does not promote sustainable management of natural & physical resources & contrary to the purposes & principles of the RMA. More than minor adverse effects eg noise dust odour traffic and no effort to avoid/remedy or mitigate those effects. This will exacerbate the existing conflict between this intensive operation and the adjacent residential activities within residential zones and proposed zones. We are sick and tired of the constant odour breaches, unacceptable noise, and increasing traffic and the impact it is having on our lives and property.	<b>We seek the full application be declined. Further seek that this application be heard at the same time as the HBRC odour consent</b>
154 Birgit Endres & Leo Kronenburg	:Oppose	Does not promote sustainable management of natural & physical resources & contrary to the purposes & principles of the RMA. More than minor adverse effects eg noise dust odour traffic and no effort to avoid/remedy or mitigate those effects. This will exacerbate the existing conflict between this intensive operation and the adjacent residential activities within residential zones and proposed zones. We are sick and tired of the constant odour breaches, unacceptable noise, and increasing traffic and the impact it is having on our lives and property.	<b>We seek the full application be declined. Further seek that this application be heard at the same time as the HBRC odour consent</b>
155 Karin Campbell	Oppose	Opposes the application because of the odours that are discharged	<b>Wish that the application be declined</b>
156 Alexander Reid Montgomery	:Oppose	Does not promote sustainable management of natural & physical resources & contrary to the purposes & principles of the RMA. More than minor adverse effects eg noise dust odour traffic and no effort to avoid/remedy or mitigate those effects. This will exacerbate the existing conflict between this intensive operation and the adjacent residential activities within residential zones and proposed zones. We are sick and tired of the constant odour breaches, unacceptable noise, and increasing traffic and the impact it is having on our lives and property.	<b>We seek the full application be declined. Further seek that this application be heard at the same time as the HBRC odour consent</b>
157 Natalie Godber	:Oppose	Does not promote sustainable management of natural & physical resources & contrary to the purposes & principles of the RMA. More than minor adverse effects eg noise dust odour traffic and no effort to avoid/remedy or mitigate those effects. This will exacerbate the existing conflict between this intensive operation and the adjacent residential activities within residential zones and proposed zones. We are sick and tired of the constant odour breaches, unacceptable noise, and increasing traffic and the impact it is having on our lives and property.	<b>We seek the full application be declined. Further seek that this application be heard at the same time as the HBRC odour consent</b>
158 Richard Tresidder	:Oppose	Does not promote sustainable management of natural & physical resources & contrary to the purposes & principles of the RMA. More than minor adverse effects eg noise dust odour traffic and no effort to avoid/remedy or mitigate those effects. This will exacerbate the existing conflict between this intensive operation and the adjacent residential activities within residential zones and proposed zones. We are sick and tired of the constant odour breaches, unacceptable noise, and increasing traffic and the impact it is having on our lives and property.	<b>We seek the full application be declined. Further seek that this application be heard at the same time as the HBRC odour consent</b>
159 Dale Lynette Jackson	:Oppose	Does not promote sustainable management of natural & physical resources & contrary to the purposes & principles of the RMA. More than minor adverse effects eg noise dust odour traffic and no effort to avoid/remedy or mitigate those effects. This will exacerbate the existing conflict between this intensive operation and the adjacent residential activities within residential zones and proposed zones. We are sick and tired of the constant odour breaches, unacceptable noise, and increasing traffic and the impact it is having on our lives and property.	<b>We seek the full application be declined. Further seek that this application be heard at the same time as the HBRC odour consent</b>
160 Anne & Ronald Cribb	:Oppose	Does not promote sustainable management of natural & physical resources & contrary to the purposes & principles of the RMA. More than minor adverse effects eg noise dust odour traffic and no effort to avoid/remedy or mitigate those effects. This will exacerbate the existing conflict between this intensive operation and the adjacent residential activities within residential zones and proposed zones. We are sick and tired of the constant odour breaches, unacceptable noise, and increasing traffic and the impact it is having on our lives and property.	<b>We seek the full application be declined. Further seek that this application be heard at the same time as the HBRC odour consent</b>
161 Bayne Dyres Walker	:Oppose	Does not promote sustainable management of natural & physical resources & contrary to the purposes & principles of the RMA. More than minor adverse effects eg noise dust odour traffic and no effort to avoid/remedy or mitigate those effects. This will exacerbate the existing conflict between this intensive operation and the adjacent residential activities within residential zones and proposed zones. We are sick and tired of the constant odour breaches, unacceptable noise, and increasing traffic and the impact it is having on our lives and property.	<b>We seek the full application be declined. Further seek that this application be heard at the same time as the HBRC odour consent</b>
162 Hastings District Council	:Oppose	Supports joint hearing with HBRC. Application didn't adequately address the adverse effects of the increase in compost production and provision of means to avoid or mitigate. Tonkin & Taylor peer review of the odour assessment identified some gaps; odour mitigation will not occur within 8mths Despite the T&T peer review being available since June 2017 an updated assessment has not been explored to address shortcomings of T&T review.	<b>Consent only be granted for that level of development need for compost production for which the odour effects can be mitigated otherwise consent be declined.</b> <b>If granted, LU consent be subject to a condition that there be no offensive or objectionable odour</b>
