		re breaches from Affco, WDC & Silver Fern Farms.	
		Evidence to show these effects are minor when Affco have yet to submit independent environmental	
		impact reports?  2. When conditions put in place in 2012 did RC expect to still be waiting to see results & reports in	
		August 2016?  3. What are main causes for lack of progress and would it be tolerated by others given resource	
		consent conditions at the time?	
		Re WDC what level of improvement are you looking for before their consent is renewed in 2019?     What will need to change before NPSFM is gazetted next April in terms of these three	
		organisations, for other farming operations situated by a waterway - and over what timeframe?  6. If a council is addressing its infiltration problems what time frame would they have to reduce the	
9/08/2016 OIR-16-094	Wairoa Star Consents Query	levels of COD and suspended solids discharge exceedances?  Some sort of indication of the location of complaints in 2015/2016? e.g. in the attached snapshot	Ann Revington, Wairoa Star
		report by Jacobs on reverse sensitivity prepared for Hastings District Council in 2015. I don't need	
8/08/2016 OIR-16-093	Complaints Request for Te Mata Mushrooms	actual addresses but I would be really interested to see where the spread of complaints has come from over 2015 and 2016 to date.	Tracy Freeman Air Quality Professionals Pty Ltd
		Who will the "approved providers" be?     Who will check that the information given in a FEMP is correct?	
		3. How will anyone know if a property owner puts on more fertiliser than is in their FEMP or at	
		different times etc?  4. Who will audit the plans outside of the process?	
		<ol><li>To clarify my previous final question: should a HBRC river monitoring point find that, say, nitrate levels are above the limits in PC6, how will HBRC determine which property or properties are</li></ol>	
		responsible for the breaches, and how will they distinguish between "current pollution" and "legacy	
		pollution"? Given that it can take many years for nitrate to move through the water table it would be unfair to punish a new property owner for the actions of a past owner. How is HBRC going to deal	
		with that issue?  6. Also, I can imagine a situation where there is a breach of in-stream nitrate levels, but the nutrient	
		budgets of all properties feeding in to that stream are deemed to be acceptable for their land use.  What course of action will HBRC take then?	
		7. Is HBRC aware that the Overseer model has not been tested or validated for Hawke's Bay	
		conditions, and that there is no record (that I am aware of, and I have asked the Overseer team) of how accurate it is at predicting whole of farm nitrate leaching?
