Request Date 23/08/2016 12/08/2016	OIR-16-096	Request Status Completed	Request Subject resource consents in vicinity of Havelock North water supply bores Water Take or Use Resource Consents	Request Summary DNA tests indicate the source of HN containnation is ruminant & most likely ruminant dairy cows: 1. any dairy operations within 1km of Brookvale Road wells? 2. if yes, ob the y have resource consents? 3. if no, what action is being taken? 4. if yes, do the resource consents cover the discharge or disposal of dairy effluent? 5. if intensive dairy operations do they have appropriate resource consents for disposal by composting or otherwise of solids? 6. If there are such operations and consents are they operating within their consents? and if not, what action is being taken? 7. If a consented & compliant operation found to be contaminating the Havelock North water supply due to unforeseen or changing conditions what steps can be taken to eliminate the contamination either at the source or in the water management process? 8. Could such a situation be foreseen & was this noted in the Resource Consent process? 9. Has any councillor had knowledge of such an operation & not drawn it to the attention of staff either directly or by way of Council at either Regional or District level? Freshwater is allocated between uses under RNA under first-in first-served, meaning that earlier	Requested By Individual
12/06/2016	014-70-090	Completed	water rake of Ose Resource Consents	Prestivated is allocated between uses under hisk-induct inscienting control in the resource on sent applications have priority. Please provide - in a table format - lists of currently pending applications for new resource consents to take/use water, including: 1/ name of the party making application; 2/ quantity of water sought to take/use; 3/ purpose of the water take/use consent as specified by the applicant; 4/ date the application was received by HBRC. Sort the table by the date of receipt of the application, oldest to newest and highlight any applications that seek to take/use water for human/domestic consumption.	woodward Law Onice
1/08/2016	OIR-16-095	Completed	Water Science and Monitoring	Request further information in relation to invoice # \$1034110 Consent: DP150021L 1. Provide itemised breakdown for Water Science Annual Variable Charge 2. Provide dates when any monitoring occurred 1/7/15-30/6/16 and any results/reports from the monitoring	Individual
9/08/2016	OIR-16-094	Completed	Wairoa Star Consents Query	 re breaches from Affco, WDC & Silver Fern Farms. Evidence to show these effects are minor when Affco have yet to submit independent environmental impact reports? When conditions put in place in 2012 did RC expect to still be waiting to see results & reports in August 2016? What are main causes for lack of progress and would it be tolerated by others given resource consent conditions at the time? Re WDC what level of improvement are you looking for before their consent is renewed in 2019? What will need to change before NPSFM is gazetted next April in terms of these three organisations, for other farming operations situated by a waterway - and over what timeframe? If a council is addressing its infiltration problems what time frame would they have to reduce the levels of COD and suspended solids discharge exceedances? 	Wairoa Star Journalist
8/08/2016	OIR-16-093	Completed	Complaints Request for Te Mata Mushrooms	Some sort of indication of the location of complaints in 2015/2016? e.g. in the attached snapshot report by Jacobs on reverse sensitivity prepared for Hastings District Council in 2015. I don't need actual addresses but I would be really interested to see where the spread of complaints has come from over 2015 and 2016 to date.	Air Quality Professionals Pty Ltd
3/08/2016	OIR-16-092	Completed	Farm Environmental Management Plans	 Who will the "approved providers" be? Who will check that the information given in a FEMP is correct? Show will anyone know if a property owner puts on more fertiliser than is in their FEMP or at different times etc? Who will audit the plans outside of the process? To clarify my previous final question: should a HBRC river monitoring point find that, say, nitrate levels are above the limits in PC6, how will HBRC determine which property or properties are responsible for the breaches, and how will they distinguish between "current pollution" and "legacy pollution" Given that it can take many years for nitrate to move through the water table it would be unfair to punish a new property owner for the actions of a past owner. How is HBRC going to deal with that issue? Also, I can imagine a situation where there is a breach of in-stream nitrate levels, but the nutrient budgets of all properties feeding in to that stream are deemed to be acceptable for their land use. What course of action will HBRC take then? Is HBRC awre that the Overseer model has not been tested or validated for Hawke's Bay conditions, and that there is no record (that I am aware of, and I have asked the Overseer team) of how accurate it is at predicting whole of farm nitrate leaching? 	Individual
4/08/2016	OIR-16-091	Completed	Water Bottling companies	Details of 4 companies granted consents to take/use the largest amounts of water per annum for commercial water bottling including: a) the length of each consent; b) the maximum quantity of water it permits the company to take per annum; and c) any annual fees and/or charges (specifying whether GST inclusive/exclusive) the company permit house the found in an uncompany to take per annum; and	Woodward Law
4/08/2016	OIR-16-090	Completed	Compliance Information	must pay the Council pursuant to the consent. For 1 July 2015 to 30 June 2016, the #of each issued to each TA in relation to its resource consents for discharge from its severage system: 1 Abatement notices 2 Infringement orders 3 Convictions For 1 July 2015 to 30 June 2016, the # of each issued to each TA in relation to its consents for discharge from its stormwater system: 5 Abatement notices. 6 Infringement notices. 7 Enforcement orders. 8 Convictions TAs - Hastings District Council, Napier City Council & Rangitikei District Council For 1 July 2015 to 30 June 2016, the # of abatement notices, infringement notices, enforcement orders, and convictions issued to each of NCC & HDC for: solid waste; and water consents.	Audit NZ
25/07/2016	OIR-16-089	Completed	Makaroro Reservoir	 - is there only going to be one turbine of 6.5MW? - Why this significant change from original design? - Has there been a design evaluation for water turbine, with continuous environmental flow of 1.2am3/s? - Does "The activities authorised by this consent shall be undertaken" mean that all water being discharged from Makaroro reservoir needs to be used for generating electricity? . When does this National Policy statement for renewable electricity generation have to be fulfilled? 	Individual
19/07/2016	OIR-16-088	Completed	dairy prosecutions and abatement notices	- how many prosecutions, abatement notices & infringement notices council issued for dairy effluent discharges in the 2015-16 financial year the name of all prosecuted parties, charges faced & outcome of any court action info on inspections council makes of dairy farms how many dairy farms there are within your region how many dairy farms are inspected each year (ie all, half, a percentage) - how inspections are carried out (ie on foot, by helicopter, or other means) - does the council advise the farm owner of the inspection before it occurs? If so, how far in advance of the inspection is advice given?	Journalist
18/07/2016	OIR-16-087	Completed	4 largest Irrigation or Water Bottling Consents	Details of 4companies granted consents to take/use the largest amounts of water per annum in your region for commercial water bottling or irrigation including: a) the length of each consent; b) the maximum quantity of water it permits the company to take per annum; and c) any annual fees and/or charges the company must pay the Council pursuant to the consent.	Woodward Law Office

5/08/2015	OIR-15-052	Completed	copy Brent Cowie's "A Review of the Processing of Recent Major Resource Consent Applications by the Hawkes Bay Regional Council September 2009 report	Individual
22/07/2015	OIR-15-051	Completed	1. A copy of any environmental reports submitted to HBRC in support of One Pure resource consent application	Individual
28/07/2015	OIR-15-050	Completed	all information regarding a further extention to consent processing on Whakatu Wool Scour	Individual
23/07/2015	OIR-15-049	Completed	Limited application DP140591A Otane WWTP	Individual
			 which Council staff "working" with CHBDC staff to avoid "the need for a public hearing?" whether CHBDC consent application, by not recognising the Papanui Aquifer groundwater as 	
			the "receiving environment" is designed to achieve that aim?	
			3. whether absence of info in the application on the effects of the effluent on the groundwaters of the Papanui Aquifer is helpful to regulatory staff?	
			4. The view of HRC hydrologists on whether effluent from the farm drain makes contact with	
16/06/2015	OIR-15-048	Completed	Papanui Aquifer groundwater Otane WWTP resource consent	Individual
			1 criteria/conditions for deciding whether a resource consent application is "notified"	
			 Is the new Otane WWTP going to be notified? Does the effluent (product outflow) have any effect on the water quality in the Papanui 	
			Aquifer 4. (a) Has HBRC carried out any research to determine the effect of the Otane WWTP outflow on	
			the Papanui aquifer?	
			(b) if yes, the findings?5. At what locations is the quality of the outflow from the Otane WWTP measured at present	
			and under the new resource consent?	
			6. What water quality conditions are specified in the new resource consent for the Otane WWTP?	
			7. What is the date by which the Otane WWTP must meet the water quality conditions in the new resource consent?	
			8.(a) Did the HBRC commission a consultant to report on the performance of the present or	
			proposed design of the Otane WWTP? (b) if such a report exists, may we have a copy?	
9/07/2015	OIR-15-047	Completed	(1) How does HBRC justify treating the Kaikoura Stream (also called the "Te Aute Drain") as the	Individual
			"receiving water" for the effluent from the Otane WWTP when effluent does not get that far during Summer? (2) Given that the CHBDC application and its consultants reports indicate that	
			the effluent from the Otane WWTP sinks into groundwater, shouldn't the Papanui Aquifer be acknowledged as the "receiving water"?
