Disaster Recovery

Te Hokinga ki te Ora i muri i te Aituā

Category 2C (Community)

Definitions	Community level interventions are effective in managing future severe weather event risk.
Examples	Local government repairs and enhances flood protection schemes to adequately manage the risk of future flooding events in the face of climate change effects.
What does this mean for my claim?	No impact to claim, claim will continue to progress as normal.
What does this mean for my ongoing insurance?	<p>As done following the Westport and Edgecumbe events, insurers will continue to support communities whilst wide scale interventions are worked through.</p> <p>Should these works be deferred or be shown to have not sufficiently mitigated the risks, insurers may re-evaluate ongoing cover.</p> <p>There could be a variety of approaches from insurers, some will continue with existing terms, some may place new risks under more scrutiny than existing customers, and others, at renewal time, may be looked at on a case-by-case basis. Depending on the level of risk, normal underwriting levers would be applied – e.g., price, excess, or exclusion of some hazards until preventative work has been completed by the relevant council(s).</p>
