A Stronger Region

Creating a good mix of land uses is the key to a better region.

The Ruataniwha Water Storage Scheme will give farmers a reliable source of water all year round, even in the very dry summer months. This also gives farmers more options for land uses, with new opportunities to grow and diversify. If the region doesn’t rely too heavily on one single land use, we’ll have a buffer against highs and lows in the rural economy, for the benefit of us all.

COMMUNITY BENEFITS

More than 2,500 new jobs strengthening local communities

Increased economic activity leading to a boost for local businesses

Additional families to lift local school rolls
