

# Boating Safety

## EDUCATION PROGRAMME

# **Hawke's Bay Regional Council is pleased to offer this FREE programme jointly funded by Maritime New Zealand**

## ***Our educators will visit your school to teach your students about safety in and around boats***

### **During the 60-minute session students will:**

- Enjoy a fun, interactive presentation on boating safety;
- Participate in a life jacket demonstration;
- Enjoy an interactive session with our VR headsets

For the best experience we limit the numbers for each session to 30 to 40 children. If you have more children wanting to participate, we can do more than one session.

Part of our session is held outside, weather permitting, but the VR interactive session requires wifi and a classroom, hall, or similar indoor location.

***Captain Martin Moore,  
Regional Harbourmaster***

## A group of five children are posed outdoors, all wearing bright yellow life jackets. They are holding various fire safety items: one child holds a large yellow fire extinguisher, another a smaller red one, and others hold smoke alarms and a fire alarm pull station. The background shows a residential area with houses and trees under a clear blue sky.

A group of five children, three girls and two boys, are posing outdoors. They are all wearing bright yellow life jackets with black straps. The child on the far left is holding a red fire extinguisher. The child in the center is holding a small yellow smoke detector. The child on the far right is holding a yellow fire extinguisher. The other two children are also holding fire safety items. They are standing in front of a building with a corrugated metal roof and some trees in the background.
